Project

Crypto Tracker | Reactjs, Tailwind Css , MUI , Framer Motion, React Router, Axios

[Live](#)

[Code](#)

- Crypto tracker is a React – based web application designed to display real – time cryptocurrency data .
- Displayed data for 200 cryptocurrencies with support for both **grid and list views** to enhance user experience.
- Implemented a **detailed coin page** showcasing historical price trends, market capitalization, and value charts using **Chart.js**.
- Built a **comparison feature** enabling users to view two cryptocurrencies side-by-side for comprehensive analysis.
- Designed and developed a **fully responsive, cross-device compatible** interface for seamless performance on desktops, tablets, and smartphones.
- Utilized **React Router** for seamless navigation across the application and **Framer Motion** for smooth, modern animations.

News & Blog | Reactjs, Css, Axios

[Live](#)

[Code](#)

- Developed a **React-based** web application combining a news reader, blog platform, integrated weather widget, and calendar feature.
- Implemented a **category-based news section** allowing users to filter and view news articles by topics of interest.
- Enabled users to **write, save, and manage personal blog posts** with persistent storage using **localStorage**.
- Integrated a **weather application** and **calendar tool** to enhance the app's utility and user engagement.
- Designed a **fully responsive** layout to ensure seamless functionality across all screen sizes and devices.

Nike Shoes E-commerce | Reactjs , Tailwind Css, Redux Toolkit , React Toastify,

[Live](#)

[Code](#)

- Designed and developed a **Nike-inspired e-commerce web application** using **React.js** and **Tailwind CSS**, featuring a clean and responsive UI.
- Implemented **Add to Cart functionality** with product data managed locally and persisted using **Redux Toolkit** and **localStorage**.
- Utilized **Redux Toolkit** for efficient global **state management** and to handle cart operations across components.
- Built with **hardcoded product data**, structured for easy scalability and potential integration with APIs in the future.
- Ensured **mobile-first responsiveness**, delivering a consistent shopping experience across desktops, tablets, and mobile devices.

Technical Skill

Programming Languages : C++, Java, JavaScript

Web Technologies : HTML , CSS , Javascript

Tools : Git & GitHub , Vs Code , intelliJidea

Frameworks & Lib. : Reactjs , Tailwindcss , Bootstrap ,ReduxToolkit

Basic of DSA

Certification

- React Js Youtube course
- Wadhwani soft-skill Training
- Hacker rank Java
- Forage EA Job Simulation
